Fountain of Youth Lies in Daily Diet

Dr. Oldfield Prescribes Fruits, Eggs, Milk and Uncooked Salads.

In Associated Press. 1

LONDON, Nov. 8.—Dr. Josiah Oldfield. Known internationally as a physician and a writer, has published a prescription for keeping old age at bay.

According to him, it is not a question of an operation, but a daily diet, which includes dandelion leaves, fowl's eggs, grapes, lettuce, cow's milk, water cress, honey and salads (uncooked).

"Old age," he says, "is largely caused by deposit in the blood vessels and cells of the body of waste matter. So by adopting a part fruitarian diet a man, however old, may become young again, because every cell in the bady will be replaced by new young cells."

Dr. Oldfield considers that a normal person rightly fed should live from ninety to 105 years of age.
